

VIRTUAL ARBORETUM

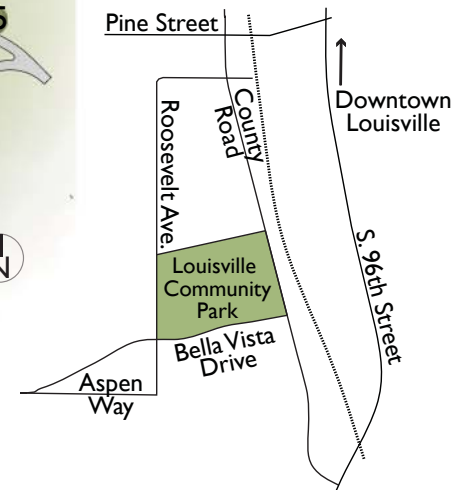

Louisville Community Park

How to use this arboretum

To locate and identify the trees, print out this map and tree guide and take with you to the park. Match the number of the tree on the map with the trees on the tree guide.

Look at the shapes of the leaves and the trees. Do the trees have special features such as cones or seeds? Are there flowers or fruit on them? Come back at different times of the year and see how the trees change over time.
